

Qualcomm Incorporated

Qualcomm is a FORTUNE 500 company and a global leader in developing and delivering next-generation wireless technology. Qualcomm employs more than 14,000 people around the world, who are focused on innovating new ways to communicate. As a leading developer of advanced wireless technologies and integrated solutions, Qualcomm is well equipped to provide an advanced multimode GPS position-location technology: gpsOne™, which is the most widely deployed position location solution in the world.

gpsOne: Because Your Position in Life Really Does Matter

GPS technology and location-based services have become essential to modern living. Used in more than 300 million handsets, gpsOne goes well beyond just defining your location. Location-based services, which utilize GPS, are available to make your life easier, more entertaining, more secure and more informative.

With the gpsOne solution, navigating from point A to point B becomes much more efficient, especially when information on weather, traffic, accidents, etc., is automatically utilized to suggest alternative routes for travel. gpsOne uses location data to provide closer contact with your friends and family, making it easier to keep in touch and to spend time together. And, it increases your opportunities for fun with dynamic suggestions for dining, shopping and other recreation as you travel.

gpsOne delivers immediate, precise geo-positioning information and is powerful enough to provide location data seamlessly, wherever you go. It also can use location data to enrich other multimedia experiences within your life. Used in combination with other leading wireless technologies from Qualcomm, gpsOne can power multi-functional ap-

plications that use location in ways you may have not thought possible. Imagine being able to take a photo or record a video with a location stamp immediately captured with the image metadata. How about having a 3D map displayed on your phone to help you precisely pinpoint and depict your destination in a more realistic fashion? Gaming enthusiasts can leverage their playing skills in geo-caching environments or they can sniff out potential challengers within a defined radius of their own location.

Navigate Your Career Towards Qualcomm

Qualcomm has been widely recognized for being an exceptional place to build your career. That's just one of the reasons FORTUNE magazine named Qualcomm to its list of the "100 Best Companies to Work For" ten years in a row. Qualcomm firmly believes the foundation of their success is bright, creative people working together, bringing their unique ideas to create an incredibly diverse and inspiring work environment.

Qualcomm is always looking for motivated achievers like you to join them in raising the wireless bar even higher. Ready to put your wireless dreams to work?

Qualcomm is hiring in the areas of GPS and GNSS technology. Visit www.qualcomm.com/careers to learn more today.
